JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

the basis upon which the types of houses were determined, particularly with regard to the size, arrangement of rooms, etc.

The chapter on "Industrial Unrest" might have been sacrificed in order to make room for a more detailed discussion of some of the processes which have led Mr. Hutton to his conclusions. The practical side of the problem as revealed from Mr. Hutton's unusual experience seems to be more in his field than a broad discussion of economic and social problems which he has attempted in his chapter on "Industrial Unrest."

CAROL ARONOVICI

ST. PAUL, MINNESOTA

---

*Housing Conditions in the City of Saint Paul.* By CAROL ARONOVICI, PH.D. St. Paul: Amherst H. Wilder Co., 1918. Pp. 120. \$0.50.

This report was made to the Housing Commission in St. Paul concerning the conditions under which people live in that city, but the year in which the report or the survey was made is not indicated. Eighteen selected sections of St. Paul, inhabited by 18,425 people from many races, were included in the study. Thirty-four tables, several charts, a large number of splendid photographs, maps, and drawings are used to support and to illustrate the housing facts which have been obtained by the investigators, working under the direction of Dr. Carol Aronovici.

The recommendations for a new housing code for St. Paul appear to be excellent; they deserve study by the housing authorities in other large cities of the United States. For the urban housing and health worker, another valuable feature is an extended analysis of the housing ordinances in many large American cities; the regulations concerning ventilation, fire protection, water supply, plumbing, and so forth are concisely given and arranged for comparative purposes.

E. S. BOGARDUS

UNIVERSITY OF SOUTHERN CALIFORNIA

*The Psychology of Handling Men in the Army.* By JOSEPH PETERSON, M.D., and QUENTIN J. DAVID, L.L.B. Minneapolis, Minn.: Perine Book Company, 1918. Pp. 146. \$1.00.

This small book is fairly interesting and would prove helpful to an officer whose task was the immediate handling of privates if he were not familiar with the elements of psychology. It presents nothing new and is not based on any inductive study made during the present war,
